

301. (Operating Systems) Which page replacement algorithm gives minimum faults?

A) FIFO B) LRU C) Random D) Optimal

Answer: D

302. (Operating Systems) Which page replacement algorithm gives minimum faults?

A) FIFO B) LRU C) Random D) Optimal

Answer: D

303. (Operating Systems) UDP is best for:

A) Reliable transfer B) Streaming C) Secure transfer D) File system

Answer: B

304. (Data Structures) Time complexity of merge sort?

A) $O(n)$ B) $O(n \log n)$ C) $O(n^2)$ D) $O(\log n)$

Answer: B

305. (Data Structures) Which normal form removes partial dependency?

A) 1NF B) 2NF C) 3NF D) BCNF

Answer: B

306. (Data Structures) Which page replacement algorithm gives minimum faults?

A) FIFO B) LRU C) Random D) Optimal

Answer: D

307. (Computer Networks) Which page replacement algorithm gives minimum faults?

A) FIFO B) LRU C) Random D) Optimal

Answer: D

308. (DBMS) Spiral model focuses on:

A) Risk analysis B) Testing C) Coding D) Deployment

Answer: A

309. (Computer Networks) Which normal form removes partial dependency?

A) 1NF B) 2NF C) 3NF D) BCNF

Answer: B

310. (Data Structures) Which ML algorithm is used for classification?

A) Linear Regression B) KNN C) Clustering D) PCA

Answer: B

311. (DBMS) Spiral model focuses on:

A) Risk analysis B) Testing C) Coding D) Deployment

Answer: A

312. (Data Structures) Which page replacement algorithm gives minimum faults?

A) FIFO B) LRU C) Random D) Optimal

Answer: D

313. (Data Structures) Which normal form removes partial dependency?

A) 1NF B) 2NF C) 3NF D) BCNF

Answer: B

314. (Operating Systems) Which page replacement algorithm gives minimum faults?

A) FIFO B) LRU C) Random D) Optimal

Answer: D

315. (AI/ML) Which ML algorithm is used for classification?

A) Linear Regression B) KNN C) Clustering D) PCA

Answer: B

316. (DBMS) Which ML algorithm is used for classification?

A) Linear Regression B) KNN C) Clustering D) PCA

Answer: B

317. (Computer Networks) UDP is best for:

A) Reliable transfer B) Streaming C) Secure transfer D) File system

Answer: B

318. (Data Structures) UDP is best for:

A) Reliable transfer B) Streaming C) Secure transfer D) File system

Answer: B

319. (Software Engineering) Time complexity of merge sort?

A) $O(n)$ B) $O(n \log n)$ C) $O(n^2)$ D) $O(\log n)$

Answer: B

320. (Software Engineering) Time complexity of merge sort?

A) $O(n)$ B) $O(n \log n)$ C) $O(n^2)$ D) $O(\log n)$

Answer: B

321. (DBMS) UDP is best for:

A) Reliable transfer B) Streaming C) Secure transfer D) File system

Answer: B

322. (Software Engineering) Time complexity of merge sort?

A) $O(n)$ B) $O(n \log n)$ C) $O(n^2)$ D) $O(\log n)$

Answer: B

323. (DBMS) Time complexity of merge sort?

A) $O(n)$ B) $O(n \log n)$ C) $O(n^2)$ D) $O(\log n)$

Answer: B

324. (Operating Systems) Which page replacement algorithm gives minimum faults?

A) FIFO B) LRU C) Random D) Optimal

Answer: D

325. (Data Structures) Which normal form removes partial dependency?

A) 1NF B) 2NF C) 3NF D) BCNF

Answer: B

326. (DBMS) UDP is best for:

A) Reliable transfer B) Streaming C) Secure transfer D) File system

Answer: B

327. (Operating Systems) Which normal form removes partial dependency?

A) 1NF B) 2NF C) 3NF D) BCNF

Answer: B

328. (Software Engineering) Which page replacement algorithm gives minimum faults?

A) FIFO B) LRU C) Random D) Optimal

Answer: D

329. (AI/ML) Spiral model focuses on:

A) Risk analysis B) Testing C) Coding D) Deployment

Answer: A

330. (Data Structures) Which ML algorithm is used for classification?

A) Linear Regression B) KNN C) Clustering D) PCA

Answer: B

331. (Software Engineering) Spiral model focuses on:
A) Risk analysis B) Testing C) Coding D) Deployment

Answer: A

332. (AI/ML) Time complexity of merge sort?

A) $O(n)$ B) $O(n \log n)$ C) $O(n^2)$ D) $O(\log n)$

Answer: B

333. (Computer Networks) Spiral model focuses on:

A) Risk analysis B) Testing C) Coding D) Deployment

Answer: A

334. (DBMS) Which ML algorithm is used for classification?

A) Linear Regression B) KNN C) Clustering D) PCA

Answer: B

335. (Data Structures) Which ML algorithm is used for classification?

A) Linear Regression B) KNN C) Clustering D) PCA

Answer: B

336. (Software Engineering) Spiral model focuses on:

A) Risk analysis B) Testing C) Coding D) Deployment

Answer: A

337. (Software Engineering) Spiral model focuses on:

A) Risk analysis B) Testing C) Coding D) Deployment

Answer: A

338. (Computer Networks) Time complexity of merge sort?

A) $O(n)$ B) $O(n \log n)$ C) $O(n^2)$ D) $O(\log n)$

Answer: B

339. (AI/ML) Which ML algorithm is used for classification?

A) Linear Regression B) KNN C) Clustering D) PCA

Answer: B

340. (Operating Systems) Which normal form removes partial dependency?

A) 1NF B) 2NF C) 3NF D) BCNF

Answer: B

341. (Computer Networks) Spiral model focuses on:

A) Risk analysis B) Testing C) Coding D) Deployment

Answer: A

342. (AI/ML) Which page replacement algorithm gives minimum faults?

A) FIFO B) LRU C) Random D) Optimal

Answer: D

343. (Data Structures) Spiral model focuses on:

A) Risk analysis B) Testing C) Coding D) Deployment

Answer: A

344. (Computer Networks) UDP is best for:

A) Reliable transfer B) Streaming C) Secure transfer D) File system

Answer: B

345. (Data Structures) Time complexity of merge sort?

A) $O(n)$ B) $O(n \log n)$ C) $O(n^2)$ D) $O(\log n)$

Answer: B

346. (Computer Networks) Spiral model focuses on:

A) Risk analysis B) Testing C) Coding D) Deployment

Answer: A

347. (DBMS) UDP is best for:

A) Reliable transfer B) Streaming C) Secure transfer D) File system

Answer: B

348. (AI/ML) Which page replacement algorithm gives minimum faults?

A) FIFO B) LRU C) Random D) Optimal

Answer: D

349. (Software Engineering) Which ML algorithm is used for classification?

A) Linear Regression B) KNN C) Clustering D) PCA

Answer: B

350. (Software Engineering) Which ML algorithm is used for classification?

A) Linear Regression B) KNN C) Clustering D) PCA

Answer: B

351. (Operating Systems) Time complexity of merge sort?

A) $O(n)$ B) $O(n \log n)$ C) $O(n^2)$ D) $O(\log n)$

Answer: B

352. (Software Engineering) Which page replacement algorithm gives minimum faults?

A) FIFO B) LRU C) Random D) Optimal

Answer: D

353. (Computer Networks) Which normal form removes partial dependency?

A) 1NF B) 2NF C) 3NF D) BCNF

Answer: B

354. (AI/ML) Which normal form removes partial dependency?

A) 1NF B) 2NF C) 3NF D) BCNF

Answer: B

355. (DBMS) Which normal form removes partial dependency?

A) 1NF B) 2NF C) 3NF D) BCNF

Answer: B

356. (DBMS) Spiral model focuses on:

A) Risk analysis B) Testing C) Coding D) Deployment

Answer: A

357. (Software Engineering) Which ML algorithm is used for classification?

A) Linear Regression B) KNN C) Clustering D) PCA

Answer: B

358. (AI/ML) Time complexity of merge sort?

A) $O(n)$ B) $O(n \log n)$ C) $O(n^2)$ D) $O(\log n)$

Answer: B

359. (Data Structures) Which normal form removes partial dependency?

A) 1NF B) 2NF C) 3NF D) BCNF

Answer: B

360. (Operating Systems) Which normal form removes partial dependency?

A) 1NF B) 2NF C) 3NF D) BCNF

Answer: B

361. (Computer Networks) Time complexity of merge sort?

A) $O(n)$ B) $O(n \log n)$ C) $O(n^2)$ D) $O(\log n)$

Answer: B

362. (Operating Systems) Time complexity of merge sort?

A) $O(n)$ B) $O(n \log n)$ C) $O(n^2)$ D) $O(\log n)$

Answer: B

363. (AI/ML) Which ML algorithm is used for classification?

A) Linear Regression B) KNN C) Clustering D) PCA

Answer: B

364. (Computer Networks) Which normal form removes partial dependency?

A) 1NF B) 2NF C) 3NF D) BCNF

Answer: B

365. (AI/ML) Which page replacement algorithm gives minimum faults?

A) FIFO B) LRU C) Random D) Optimal

Answer: D

366. (AI/ML) Which page replacement algorithm gives minimum faults?

A) FIFO B) LRU C) Random D) Optimal

Answer: D

367. (Data Structures) Which ML algorithm is used for classification?

A) Linear Regression B) KNN C) Clustering D) PCA

Answer: B

368. (Software Engineering) Which ML algorithm is used for classification?

A) Linear Regression B) KNN C) Clustering D) PCA

Answer: B

369. (Computer Networks) Which normal form removes partial dependency?

A) 1NF B) 2NF C) 3NF D) BCNF

Answer: B

370. (Operating Systems) UDP is best for:

A) Reliable transfer B) Streaming C) Secure transfer D) File system

Answer: B

371. (DBMS) Which normal form removes partial dependency?

A) 1NF B) 2NF C) 3NF D) BCNF

Answer: B

372. (Computer Networks) Which normal form removes partial dependency?

A) 1NF B) 2NF C) 3NF D) BCNF

Answer: B

373. (Computer Networks) Which ML algorithm is used for classification?

A) Linear Regression B) KNN C) Clustering D) PCA

Answer: B

374. (Operating Systems) Which normal form removes partial dependency?

A) 1NF B) 2NF C) 3NF D) BCNF

Answer: B

375. (Operating Systems) UDP is best for:

A) Reliable transfer B) Streaming C) Secure transfer D) File system

Answer: B

376. (Operating Systems) Which ML algorithm is used for classification?

A) Linear Regression B) KNN C) Clustering D) PCA

Answer: B

377. (Software Engineering) UDP is best for:

A) Reliable transfer B) Streaming C) Secure transfer D) File system

Answer: B

378. (Data Structures) UDP is best for:

A) Reliable transfer B) Streaming C) Secure transfer D) File system

Answer: B

379. (Computer Networks) UDP is best for:

A) Reliable transfer B) Streaming C) Secure transfer D) File system

Answer: B

380. (Operating Systems) Which page replacement algorithm gives minimum faults?

A) FIFO B) LRU C) Random D) Optimal

Answer: D

381. (DBMS) Time complexity of merge sort?

A) $O(n)$ B) $O(n \log n)$ C) $O(n^2)$ D) $O(\log n)$

Answer: B

382. (AI/ML) Spiral model focuses on:

A) Risk analysis B) Testing C) Coding D) Deployment

Answer: A

383. (Operating Systems) Time complexity of merge sort?

A) $O(n)$ B) $O(n \log n)$ C) $O(n^2)$ D) $O(\log n)$

Answer: B

384. (DBMS) Time complexity of merge sort?

A) $O(n)$ B) $O(n \log n)$ C) $O(n^2)$ D) $O(\log n)$

Answer: B

385. (Software Engineering) UDP is best for:

A) Reliable transfer B) Streaming C) Secure transfer D) File system

Answer: B

386. (Software Engineering) Which page replacement algorithm gives minimum faults?

A) FIFO B) LRU C) Random D) Optimal

Answer: D

387. (Software Engineering) Time complexity of merge sort?

A) $O(n)$ B) $O(n \log n)$ C) $O(n^2)$ D) $O(\log n)$

Answer: B

388. (Computer Networks) Spiral model focuses on:

A) Risk analysis B) Testing C) Coding D) Deployment

Answer: A

389. (Computer Networks) Time complexity of merge sort?

A) $O(n)$ B) $O(n \log n)$ C) $O(n^2)$ D) $O(\log n)$

Answer: B

390. (AI/ML) UDP is best for:

A) Reliable transfer B) Streaming C) Secure transfer D) File system

Answer: B

391. (DBMS) Which ML algorithm is used for classification?

A) Linear Regression B) KNN C) Clustering D) PCA

Answer: B

392. (Software Engineering) Which ML algorithm is used for classification?

A) Linear Regression B) KNN C) Clustering D) PCA

Answer: B

393. (Operating Systems) Which normal form removes partial dependency?

A) 1NF B) 2NF C) 3NF D) BCNF

Answer: B

394. (Operating Systems) UDP is best for:

A) Reliable transfer B) Streaming C) Secure transfer D) File system

Answer: B

395. (Software Engineering) UDP is best for:

A) Reliable transfer B) Streaming C) Secure transfer D) File system

Answer: B

396. (AI/ML) UDP is best for:

A) Reliable transfer B) Streaming C) Secure transfer D) File system

Answer: B

397. (Operating Systems) Which ML algorithm is used for classification?

A) Linear Regression B) KNN C) Clustering D) PCA

Answer: B

398. (Software Engineering) Time complexity of merge sort?

A) $O(n)$ B) $O(n \log n)$ C) $O(n^2)$ D) $O(\log n)$

Answer: B

399. (DBMS) Time complexity of merge sort?

A) $O(n)$ B) $O(n \log n)$ C) $O(n^2)$ D) $O(\log n)$

Answer: B

400. (Operating Systems) Spiral model focuses on:

A) Risk analysis B) Testing C) Coding D) Deployment

Answer: A

401. (Operating Systems) Spiral model focuses on:

A) Risk analysis B) Testing C) Coding D) Deployment

Answer: A

402. (Computer Networks) Which normal form removes partial dependency?

A) 1NF B) 2NF C) 3NF D) BCNF

Answer: B

403. (Computer Networks) Which ML algorithm is used for classification?

A) Linear Regression B) KNN C) Clustering D) PCA

Answer: B

404. (Data Structures) UDP is best for:

A) Reliable transfer B) Streaming C) Secure transfer D) File system
Answer: B

405. (Data Structures) UDP is best for:
A) Reliable transfer B) Streaming C) Secure transfer D) File system
Answer: B

406. (DBMS) UDP is best for:
A) Reliable transfer B) Streaming C) Secure transfer D) File system
Answer: B

407. (Software Engineering) UDP is best for:
A) Reliable transfer B) Streaming C) Secure transfer D) File system
Answer: B

408. (AI/ML) Which ML algorithm is used for classification?
A) Linear Regression B) KNN C) Clustering D) PCA
Answer: B

409. (AI/ML) Which page replacement algorithm gives minimum faults?
A) FIFO B) LRU C) Random D) Optimal
Answer: D

410. (Operating Systems) Which normal form removes partial dependency?
A) 1NF B) 2NF C) 3NF D) BCNF
Answer: B

411. (Software Engineering) Which ML algorithm is used for classification?
A) Linear Regression B) KNN C) Clustering D) PCA
Answer: B

412. (Data Structures) Which normal form removes partial dependency?
A) 1NF B) 2NF C) 3NF D) BCNF
Answer: B

413. (Operating Systems) Time complexity of merge sort?
A) $O(n)$ B) $O(n \log n)$ C) $O(n^2)$ D) $O(\log n)$
Answer: B

414. (Computer Networks) UDP is best for:
A) Reliable transfer B) Streaming C) Secure transfer D) File system
Answer: B

415. (Operating Systems) Spiral model focuses on:
A) Risk analysis B) Testing C) Coding D) Deployment
Answer: A

416. (Operating Systems) Which normal form removes partial dependency?
A) 1NF B) 2NF C) 3NF D) BCNF
Answer: B

417. (Software Engineering) UDP is best for:
A) Reliable transfer B) Streaming C) Secure transfer D) File system
Answer: B

418. (Operating Systems) UDP is best for:
A) Reliable transfer B) Streaming C) Secure transfer D) File system
Answer: B

419. (Data Structures) UDP is best for:
A) Reliable transfer B) Streaming C) Secure transfer D) File system
Answer: B

420. (Data Structures) Which page replacement algorithm gives minimum faults?
A) FIFO B) LRU C) Random D) Optimal
Answer: D

421. (Computer Networks) Spiral model focuses on:
A) Risk analysis B) Testing C) Coding D) Deployment
Answer: A

422. (DBMS) Which page replacement algorithm gives minimum faults?
A) FIFO B) LRU C) Random D) Optimal
Answer: D

423. (Software Engineering) UDP is best for:
A) Reliable transfer B) Streaming C) Secure transfer D) File system
Answer: B

424. (Software Engineering) Spiral model focuses on:
A) Risk analysis B) Testing C) Coding D) Deployment
Answer: A

425. (Data Structures) Time complexity of merge sort?
A) $O(n)$ B) $O(n \log n)$ C) $O(n^2)$ D) $O(\log n)$
Answer: B

426. (Operating Systems) Spiral model focuses on:
A) Risk analysis B) Testing C) Coding D) Deployment
Answer: A

427. (Operating Systems) Spiral model focuses on:
A) Risk analysis B) Testing C) Coding D) Deployment
Answer: A

428. (Operating Systems) Which normal form removes partial dependency?
A) 1NF B) 2NF C) 3NF D) BCNF
Answer: B

429. (Operating Systems) Time complexity of merge sort?
A) $O(n)$ B) $O(n \log n)$ C) $O(n^2)$ D) $O(\log n)$
Answer: B

430. (DBMS) Which ML algorithm is used for classification?
A) Linear Regression B) KNN C) Clustering D) PCA
Answer: B

431. (DBMS) Time complexity of merge sort?
A) $O(n)$ B) $O(n \log n)$ C) $O(n^2)$ D) $O(\log n)$
Answer: B

432. (Software Engineering) UDP is best for:
A) Reliable transfer B) Streaming C) Secure transfer D) File system
Answer: B

433. (AI/ML) Which normal form removes partial dependency?
A) 1NF B) 2NF C) 3NF D) BCNF
Answer: B

434. (DBMS) Which page replacement algorithm gives minimum faults?

A) FIFO B) LRU C) Random D) Optimal

Answer: D

435. (Computer Networks) Which ML algorithm is used for classification?

A) Linear Regression B) KNN C) Clustering D) PCA

Answer: B

436. (DBMS) Which page replacement algorithm gives minimum faults?

A) FIFO B) LRU C) Random D) Optimal

Answer: D

437. (Software Engineering) Which normal form removes partial dependency?

A) 1NF B) 2NF C) 3NF D) BCNF

Answer: B

438. (Computer Networks) Which normal form removes partial dependency?

A) 1NF B) 2NF C) 3NF D) BCNF

Answer: B

439. (Computer Networks) UDP is best for:

A) Reliable transfer B) Streaming C) Secure transfer D) File system

Answer: B

440. (Operating Systems) Which page replacement algorithm gives minimum faults?

A) FIFO B) LRU C) Random D) Optimal

Answer: D

441. (Operating Systems) Spiral model focuses on:

A) Risk analysis B) Testing C) Coding D) Deployment

Answer: A

442. (DBMS) Which page replacement algorithm gives minimum faults?

A) FIFO B) LRU C) Random D) Optimal

Answer: D

443. (Software Engineering) Which normal form removes partial dependency?

A) 1NF B) 2NF C) 3NF D) BCNF

Answer: B

444. (AI/ML) Which ML algorithm is used for classification?

A) Linear Regression B) KNN C) Clustering D) PCA

Answer: B

445. (Data Structures) Which ML algorithm is used for classification?

A) Linear Regression B) KNN C) Clustering D) PCA

Answer: B

446. (AI/ML) Spiral model focuses on:

A) Risk analysis B) Testing C) Coding D) Deployment

Answer: A

447. (Software Engineering) Which ML algorithm is used for classification?

A) Linear Regression B) KNN C) Clustering D) PCA

Answer: B

448. (AI/ML) Spiral model focuses on:

A) Risk analysis B) Testing C) Coding D) Deployment

Answer: A

449. (Data Structures) Which ML algorithm is used for classification?

A) Linear Regression B) KNN C) Clustering D) PCA

Answer: B

450. (AI/ML) Spiral model focuses on:

A) Risk analysis B) Testing C) Coding D) Deployment

Answer: A

451. (Data Structures) Which page replacement algorithm gives minimum faults?

A) FIFO B) LRU C) Random D) Optimal

Answer: D

452. (DBMS) Time complexity of merge sort?

A) $O(n)$ B) $O(n \log n)$ C) $O(n^2)$ D) $O(\log n)$

Answer: B

453. (Operating Systems) Which normal form removes partial dependency?

A) 1NF B) 2NF C) 3NF D) BCNF

Answer: B

454. (Data Structures) Which ML algorithm is used for classification?

A) Linear Regression B) KNN C) Clustering D) PCA

Answer: B

455. (DBMS) UDP is best for:

A) Reliable transfer B) Streaming C) Secure transfer D) File system

Answer: B

456. (Software Engineering) Which ML algorithm is used for classification?

A) Linear Regression B) KNN C) Clustering D) PCA

Answer: B

457. (Software Engineering) Spiral model focuses on:

A) Risk analysis B) Testing C) Coding D) Deployment

Answer: A

458. (Computer Networks) Which ML algorithm is used for classification?

A) Linear Regression B) KNN C) Clustering D) PCA

Answer: B

459. (Software Engineering) Which page replacement algorithm gives minimum faults?

A) FIFO B) LRU C) Random D) Optimal

Answer: D

460. (AI/ML) Which page replacement algorithm gives minimum faults?

A) FIFO B) LRU C) Random D) Optimal

Answer: D

461. (AI/ML) Spiral model focuses on:

A) Risk analysis B) Testing C) Coding D) Deployment

Answer: A

462. (Operating Systems) Time complexity of merge sort?

A) $O(n)$ B) $O(n \log n)$ C) $O(n^2)$ D) $O(\log n)$

Answer: B

463. (Data Structures) Time complexity of merge sort?

A) $O(n)$ B) $O(n \log n)$ C) $O(n^2)$ D) $O(\log n)$

Answer: B

464. (Computer Networks) Which page replacement algorithm gives minimum faults?

A) FIFO B) LRU C) Random D) Optimal

Answer: D

465. (Data Structures) Which page replacement algorithm gives minimum faults?

A) FIFO B) LRU C) Random D) Optimal

Answer: D

466. (Data Structures) Which ML algorithm is used for classification?

A) Linear Regression B) KNN C) Clustering D) PCA

Answer: B

467. (Data Structures) Which normal form removes partial dependency?

A) 1NF B) 2NF C) 3NF D) BCNF

Answer: B

468. (Software Engineering) Spiral model focuses on:

A) Risk analysis B) Testing C) Coding D) Deployment

Answer: A

469. (Computer Networks) UDP is best for:

A) Reliable transfer B) Streaming C) Secure transfer D) File system

Answer: B

470. (Computer Networks) Which ML algorithm is used for classification?

A) Linear Regression B) KNN C) Clustering D) PCA

Answer: B

471. (Data Structures) Which normal form removes partial dependency?

A) 1NF B) 2NF C) 3NF D) BCNF

Answer: B

472. (DBMS) Spiral model focuses on:

A) Risk analysis B) Testing C) Coding D) Deployment

Answer: A

473. (AI/ML) Which page replacement algorithm gives minimum faults?

A) FIFO B) LRU C) Random D) Optimal

Answer: D

474. (Data Structures) Which ML algorithm is used for classification?

A) Linear Regression B) KNN C) Clustering D) PCA

Answer: B

475. (Computer Networks) UDP is best for:

A) Reliable transfer B) Streaming C) Secure transfer D) File system

Answer: B

476. (Data Structures) Which normal form removes partial dependency?

A) 1NF B) 2NF C) 3NF D) BCNF

Answer: B

477. (AI/ML) UDP is best for:

A) Reliable transfer B) Streaming C) Secure transfer D) File system

Answer: B

478. (DBMS) Spiral model focuses on:

A) Risk analysis B) Testing C) Coding D) Deployment

Answer: A

479. (DBMS) UDP is best for:

A) Reliable transfer B) Streaming C) Secure transfer D) File system

Answer: B

480. (DBMS) Which normal form removes partial dependency?

A) 1NF B) 2NF C) 3NF D) BCNF

Answer: B

481. (AI/ML) Spiral model focuses on:

A) Risk analysis B) Testing C) Coding D) Deployment

Answer: A

482. (Software Engineering) Spiral model focuses on:

A) Risk analysis B) Testing C) Coding D) Deployment

Answer: A

483. (Computer Networks) Which ML algorithm is used for classification?

A) Linear Regression B) KNN C) Clustering D) PCA

Answer: B

484. (AI/ML) Time complexity of merge sort?

A) $O(n)$ B) $O(n \log n)$ C) $O(n^2)$ D) $O(\log n)$

Answer: B

485. (AI/ML) Time complexity of merge sort?

A) $O(n)$ B) $O(n \log n)$ C) $O(n^2)$ D) $O(\log n)$

Answer: B

486. (Software Engineering) Spiral model focuses on:

A) Risk analysis B) Testing C) Coding D) Deployment

Answer: A

487. (Computer Networks) Which normal form removes partial dependency?

A) 1NF B) 2NF C) 3NF D) BCNF

Answer: B

488. (DBMS) UDP is best for:

A) Reliable transfer B) Streaming C) Secure transfer D) File system

Answer: B

489. (Data Structures) Spiral model focuses on:

A) Risk analysis B) Testing C) Coding D) Deployment

Answer: A

490. (Software Engineering) UDP is best for:

A) Reliable transfer B) Streaming C) Secure transfer D) File system

Answer: B

491. (Computer Networks) Which normal form removes partial dependency?

A) 1NF B) 2NF C) 3NF D) BCNF

Answer: B

492. (Software Engineering) Which ML algorithm is used for classification?

A) Linear Regression B) KNN C) Clustering D) PCA

Answer: B

493. (AI/ML) Which ML algorithm is used for classification?

A) Linear Regression B) KNN C) Clustering D) PCA

Answer: B

494. (Data Structures) Which ML algorithm is used for classification?

A) Linear Regression B) KNN C) Clustering D) PCA

Answer: B

495. (AI/ML) Time complexity of merge sort?

A) $O(n)$ B) $O(n \log n)$ C) $O(n^2)$ D) $O(\log n)$

Answer: B

496. (Computer Networks) Which ML algorithm is used for classification?

A) Linear Regression B) KNN C) Clustering D) PCA

Answer: B

497. (Software Engineering) Spiral model focuses on:

A) Risk analysis B) Testing C) Coding D) Deployment

Answer: A

498. (AI/ML) Which normal form removes partial dependency?

A) 1NF B) 2NF C) 3NF D) BCNF

Answer: B

499. (DBMS) Which normal form removes partial dependency?

A) 1NF B) 2NF C) 3NF D) BCNF

Answer: B

500. (Data Structures) Which page replacement algorithm gives minimum faults?

A) FIFO B) LRU C) Random D) Optimal

Answer: D

501. (Software Engineering) UDP is best for:

A) Reliable transfer B) Streaming C) Secure transfer D) File system

Answer: B

502. (Operating Systems) Which ML algorithm is used for classification?

A) Linear Regression B) KNN C) Clustering D) PCA

Answer: B

503. (AI/ML) Time complexity of merge sort?

A) $O(n)$ B) $O(n \log n)$ C) $O(n^2)$ D) $O(\log n)$

Answer: B

504. (Software Engineering) Which ML algorithm is used for classification?

A) Linear Regression B) KNN C) Clustering D) PCA

Answer: B

505. (Operating Systems) Which page replacement algorithm gives minimum faults?

A) FIFO B) LRU C) Random D) Optimal

Answer: D

506. (Data Structures) Spiral model focuses on:

A) Risk analysis B) Testing C) Coding D) Deployment

Answer: A

507. (AI/ML) Which page replacement algorithm gives minimum faults?

A) FIFO B) LRU C) Random D) Optimal

Answer: D

508. (DBMS) Spiral model focuses on:

A) Risk analysis B) Testing C) Coding D) Deployment

Answer: A

509. (Software Engineering) Which normal form removes partial dependency?

A) 1NF B) 2NF C) 3NF D) BCNF

Answer: B

510. (DBMS) Which page replacement algorithm gives minimum faults?

A) FIFO B) LRU C) Random D) Optimal

Answer: D

511. (Software Engineering) Time complexity of merge sort?

A) $O(n)$ B) $O(n \log n)$ C) $O(n^2)$ D) $O(\log n)$

Answer: B

512. (Software Engineering) Which page replacement algorithm gives minimum faults?

A) FIFO B) LRU C) Random D) Optimal

Answer: D

513. (Software Engineering) Which page replacement algorithm gives minimum faults?

A) FIFO B) LRU C) Random D) Optimal

Answer: D

514. (Software Engineering) Which page replacement algorithm gives minimum faults?

A) FIFO B) LRU C) Random D) Optimal

Answer: D

515. (AI/ML) Time complexity of merge sort?

A) $O(n)$ B) $O(n \log n)$ C) $O(n^2)$ D) $O(\log n)$

Answer: B

516. (AI/ML) Spiral model focuses on:

A) Risk analysis B) Testing C) Coding D) Deployment

Answer: A

517. (Operating Systems) Which normal form removes partial dependency?

A) 1NF B) 2NF C) 3NF D) BCNF

Answer: B

518. (AI/ML) UDP is best for:

A) Reliable transfer B) Streaming C) Secure transfer D) File system

Answer: B

519. (Data Structures) Which ML algorithm is used for classification?

A) Linear Regression B) KNN C) Clustering D) PCA

Answer: B

520. (Data Structures) Which page replacement algorithm gives minimum faults?

A) FIFO B) LRU C) Random D) Optimal

Answer: D

521. (Computer Networks) Which page replacement algorithm gives minimum faults?

A) FIFO B) LRU C) Random D) Optimal

Answer: D

522. (AI/ML) Spiral model focuses on:

A) Risk analysis B) Testing C) Coding D) Deployment

Answer: A

523. (Computer Networks) Which normal form removes partial dependency?

A) 1NF B) 2NF C) 3NF D) BCNF

Answer: B

524. (AI/ML) UDP is best for:

A) Reliable transfer B) Streaming C) Secure transfer D) File system

Answer: B

525. (Data Structures) Which ML algorithm is used for classification?

A) Linear Regression B) KNN C) Clustering D) PCA

Answer: B

526. (DBMS) Which normal form removes partial dependency?

A) 1NF B) 2NF C) 3NF D) BCNF

Answer: B

527. (AI/ML) Spiral model focuses on:

A) Risk analysis B) Testing C) Coding D) Deployment

Answer: A

528. (Operating Systems) Spiral model focuses on:

A) Risk analysis B) Testing C) Coding D) Deployment

Answer: A

529. (AI/ML) Spiral model focuses on:

A) Risk analysis B) Testing C) Coding D) Deployment

Answer: A

530. (Data Structures) UDP is best for:

A) Reliable transfer B) Streaming C) Secure transfer D) File system

Answer: B

531. (Software Engineering) Which page replacement algorithm gives minimum faults?

A) FIFO B) LRU C) Random D) Optimal

Answer: D

532. (Operating Systems) Spiral model focuses on:

A) Risk analysis B) Testing C) Coding D) Deployment

Answer: A

533. (Software Engineering) UDP is best for:

A) Reliable transfer B) Streaming C) Secure transfer D) File system

Answer: B

534. (Computer Networks) Which ML algorithm is used for classification?

A) Linear Regression B) KNN C) Clustering D) PCA

Answer: B

535. (Data Structures) Which normal form removes partial dependency?

A) 1NF B) 2NF C) 3NF D) BCNF

Answer: B

536. (Software Engineering) Which ML algorithm is used for classification?

A) Linear Regression B) KNN C) Clustering D) PCA

Answer: B

537. (DBMS) UDP is best for:

A) Reliable transfer B) Streaming C) Secure transfer D) File system

Answer: B

538. (Data Structures) Spiral model focuses on:

A) Risk analysis B) Testing C) Coding D) Deployment

Answer: A

539. (DBMS) UDP is best for:

A) Reliable transfer B) Streaming C) Secure transfer D) File system

Answer: B

540. (Data Structures) Which normal form removes partial dependency?

A) 1NF B) 2NF C) 3NF D) BCNF

Answer: B

541. (Software Engineering) Spiral model focuses on:

A) Risk analysis B) Testing C) Coding D) Deployment

Answer: A

542. (AI/ML) Which ML algorithm is used for classification?

A) Linear Regression B) KNN C) Clustering D) PCA

Answer: B

543. (Data Structures) Spiral model focuses on:

A) Risk analysis B) Testing C) Coding D) Deployment

Answer: A

544. (DBMS) Time complexity of merge sort?

A) $O(n)$ B) $O(n \log n)$ C) $O(n^2)$ D) $O(\log n)$

Answer: B

545. (Software Engineering) Spiral model focuses on:

A) Risk analysis B) Testing C) Coding D) Deployment

Answer: A

546. (Computer Networks) Which ML algorithm is used for classification?

A) Linear Regression B) KNN C) Clustering D) PCA

Answer: B

547. (Operating Systems) Which page replacement algorithm gives minimum faults?

A) FIFO B) LRU C) Random D) Optimal

Answer: D

548. (Software Engineering) Time complexity of merge sort?

A) $O(n)$ B) $O(n \log n)$ C) $O(n^2)$ D) $O(\log n)$

Answer: B

549. (Data Structures) UDP is best for:

A) Reliable transfer B) Streaming C) Secure transfer D) File system

Answer: B

550. (Computer Networks) Which normal form removes partial dependency?

A) 1NF B) 2NF C) 3NF D) BCNF

Answer: B

551. (Software Engineering) UDP is best for:

A) Reliable transfer B) Streaming C) Secure transfer D) File system

Answer: B

552. (Software Engineering) Spiral model focuses on:
A) Risk analysis B) Testing C) Coding D) Deployment
Answer: A

553. (Data Structures) Which page replacement algorithm gives minimum faults?
A) FIFO B) LRU C) Random D) Optimal
Answer: D

554. (Operating Systems) Which ML algorithm is used for classification?
A) Linear Regression B) KNN C) Clustering D) PCA
Answer: B

555. (Operating Systems) Time complexity of merge sort?
A) $O(n)$ B) $O(n \log n)$ C) $O(n^2)$ D) $O(\log n)$
Answer: B

556. (DBMS) Spiral model focuses on:
A) Risk analysis B) Testing C) Coding D) Deployment
Answer: A

557. (AI/ML) UDP is best for:
A) Reliable transfer B) Streaming C) Secure transfer D) File system
Answer: B

558. (Software Engineering) Spiral model focuses on:
A) Risk analysis B) Testing C) Coding D) Deployment
Answer: A

559. (Data Structures) Which page replacement algorithm gives minimum faults?
A) FIFO B) LRU C) Random D) Optimal
Answer: D

560. (DBMS) UDP is best for:
A) Reliable transfer B) Streaming C) Secure transfer D) File system
Answer: B

561. (DBMS) Which normal form removes partial dependency?
A) 1NF B) 2NF C) 3NF D) BCNF
Answer: B

562. (DBMS) Which normal form removes partial dependency?
A) 1NF B) 2NF C) 3NF D) BCNF
Answer: B

563. (Operating Systems) Spiral model focuses on:
A) Risk analysis B) Testing C) Coding D) Deployment
Answer: A

564. (Software Engineering) UDP is best for:
A) Reliable transfer B) Streaming C) Secure transfer D) File system
Answer: B

565. (Computer Networks) Time complexity of merge sort?
A) $O(n)$ B) $O(n \log n)$ C) $O(n^2)$ D) $O(\log n)$
Answer: B

566. (DBMS) Time complexity of merge sort?
A) $O(n)$ B) $O(n \log n)$ C) $O(n^2)$ D) $O(\log n)$

Answer: B

567. (Data Structures) Which page replacement algorithm gives minimum faults?

A) FIFO B) LRU C) Random D) Optimal

Answer: D

568. (AI/ML) Which ML algorithm is used for classification?

A) Linear Regression B) KNN C) Clustering D) PCA

Answer: B

569. (AI/ML) Which page replacement algorithm gives minimum faults?

A) FIFO B) LRU C) Random D) Optimal

Answer: D

570. (Computer Networks) Time complexity of merge sort?

A) $O(n)$ B) $O(n \log n)$ C) $O(n^2)$ D) $O(\log n)$

Answer: B

571. (Software Engineering) Which normal form removes partial dependency?

A) 1NF B) 2NF C) 3NF D) BCNF

Answer: B

572. (AI/ML) Time complexity of merge sort?

A) $O(n)$ B) $O(n \log n)$ C) $O(n^2)$ D) $O(\log n)$

Answer: B

573. (Computer Networks) Spiral model focuses on:

A) Risk analysis B) Testing C) Coding D) Deployment

Answer: A

574. (Data Structures) Which ML algorithm is used for classification?

A) Linear Regression B) KNN C) Clustering D) PCA

Answer: B

575. (Operating Systems) Which page replacement algorithm gives minimum faults?

A) FIFO B) LRU C) Random D) Optimal

Answer: D

576. (Computer Networks) Spiral model focuses on:

A) Risk analysis B) Testing C) Coding D) Deployment

Answer: A

577. (Operating Systems) Spiral model focuses on:

A) Risk analysis B) Testing C) Coding D) Deployment

Answer: A

578. (DBMS) Which normal form removes partial dependency?

A) 1NF B) 2NF C) 3NF D) BCNF

Answer: B

579. (Operating Systems) Which normal form removes partial dependency?

A) 1NF B) 2NF C) 3NF D) BCNF

Answer: B

580. (Software Engineering) Which page replacement algorithm gives minimum faults?

A) FIFO B) LRU C) Random D) Optimal

Answer: D

581. (DBMS) Time complexity of merge sort?

A) $O(n)$ B) $O(n \log n)$ C) $O(n^2)$ D) $O(\log n)$

Answer: B

582. (Computer Networks) Which page replacement algorithm gives minimum faults?

A) FIFO B) LRU C) Random D) Optimal

Answer: D

583. (Computer Networks) Spiral model focuses on:

A) Risk analysis B) Testing C) Coding D) Deployment

Answer: A

584. (Computer Networks) Spiral model focuses on:

A) Risk analysis B) Testing C) Coding D) Deployment

Answer: A

585. (Software Engineering) Which ML algorithm is used for classification?

A) Linear Regression B) KNN C) Clustering D) PCA

Answer: B

586. (DBMS) Spiral model focuses on:

A) Risk analysis B) Testing C) Coding D) Deployment

Answer: A

587. (Operating Systems) Which normal form removes partial dependency?

A) 1NF B) 2NF C) 3NF D) BCNF

Answer: B

588. (AI/ML) UDP is best for:

A) Reliable transfer B) Streaming C) Secure transfer D) File system

Answer: B

589. (Operating Systems) Spiral model focuses on:

A) Risk analysis B) Testing C) Coding D) Deployment

Answer: A

590. (Data Structures) Spiral model focuses on:

A) Risk analysis B) Testing C) Coding D) Deployment

Answer: A

591. (Software Engineering) Which normal form removes partial dependency?

A) 1NF B) 2NF C) 3NF D) BCNF

Answer: B

592. (Computer Networks) Spiral model focuses on:

A) Risk analysis B) Testing C) Coding D) Deployment

Answer: A

593. (Software Engineering) Spiral model focuses on:

A) Risk analysis B) Testing C) Coding D) Deployment

Answer: A

594. (Data Structures) Which page replacement algorithm gives minimum faults?

A) FIFO B) LRU C) Random D) Optimal

Answer: D

595. (Computer Networks) Which ML algorithm is used for classification?

A) Linear Regression B) KNN C) Clustering D) PCA

Answer: B

596. (Data Structures) Which normal form removes partial dependency?

A) 1NF B) 2NF C) 3NF D) BCNF

Answer: B

597. (Operating Systems) Which ML algorithm is used for classification?

A) Linear Regression B) KNN C) Clustering D) PCA

Answer: B

598. (DBMS) Which ML algorithm is used for classification?

A) Linear Regression B) KNN C) Clustering D) PCA

Answer: B

599. (DBMS) UDP is best for:

A) Reliable transfer B) Streaming C) Secure transfer D) File system

Answer: B

600. (Data Structures) Spiral model focuses on:

A) Risk analysis B) Testing C) Coding D) Deployment

Answer: A
